A pricing inconsistency worth fixing

PART 1

# Hours & Traffic

Did extending hours actually pay off? And where does revenue really live during the week?

# Revenue is up 82% since the start of the period.

September 2025

**$16,390**

**+82%**

May 2026

**$29,806**

## Monthly revenue has trended upward since September

Total revenue by month, Sep 2025 - May 2026

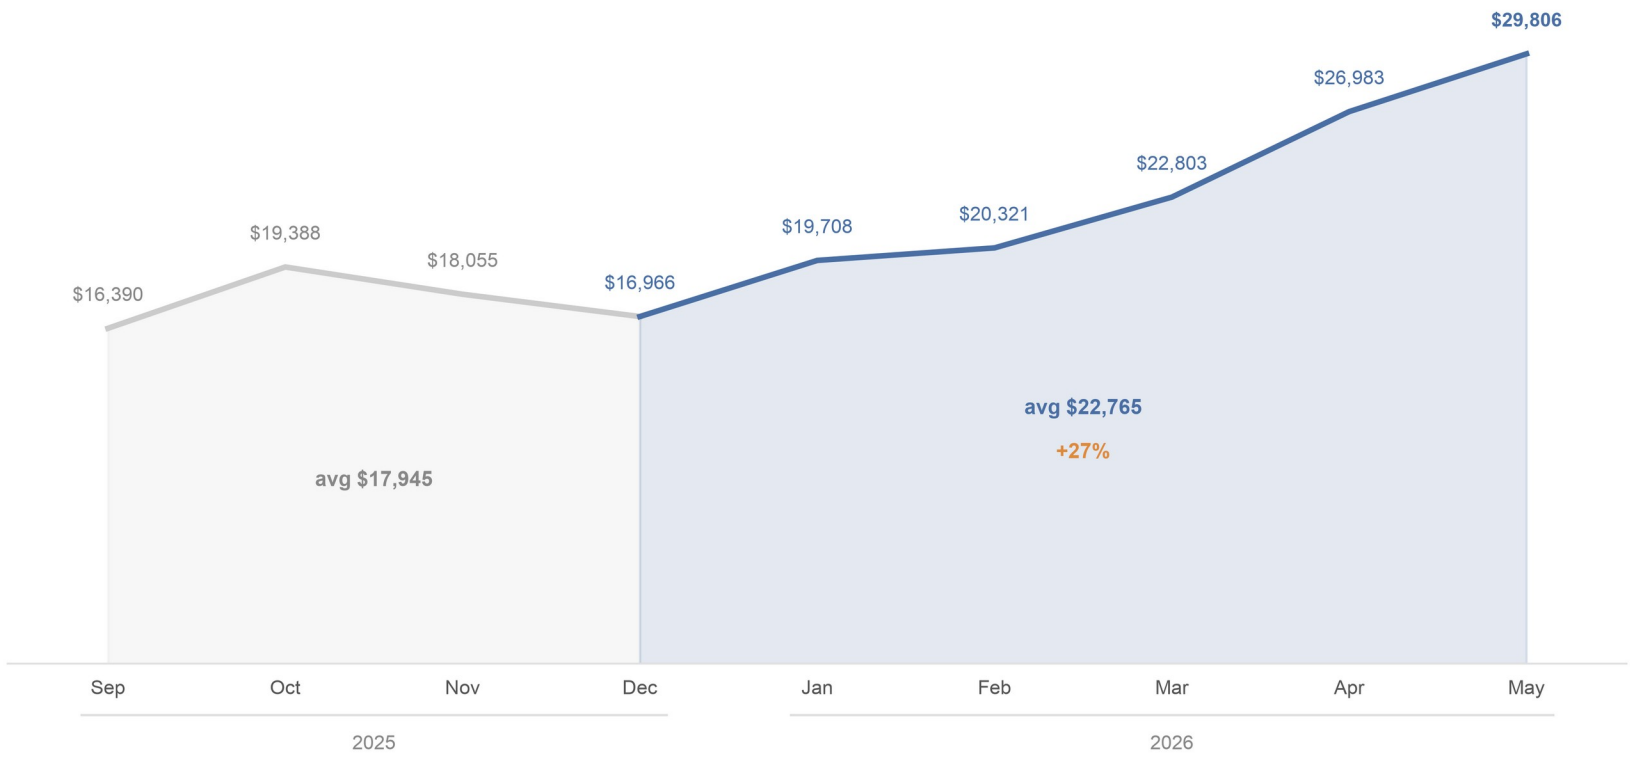

Growth hasn't slowed in nine months, not a seasonal spike.

Nine straight months of upward movement.

## Growth visibly steepens once evening hours are extended

Total revenue by month, Sep 2025 - May 2026

Ever since we extended our hours, revenue has significantly grown by an average of 27%.

# But was it really from the extension from 5 to 8pm?

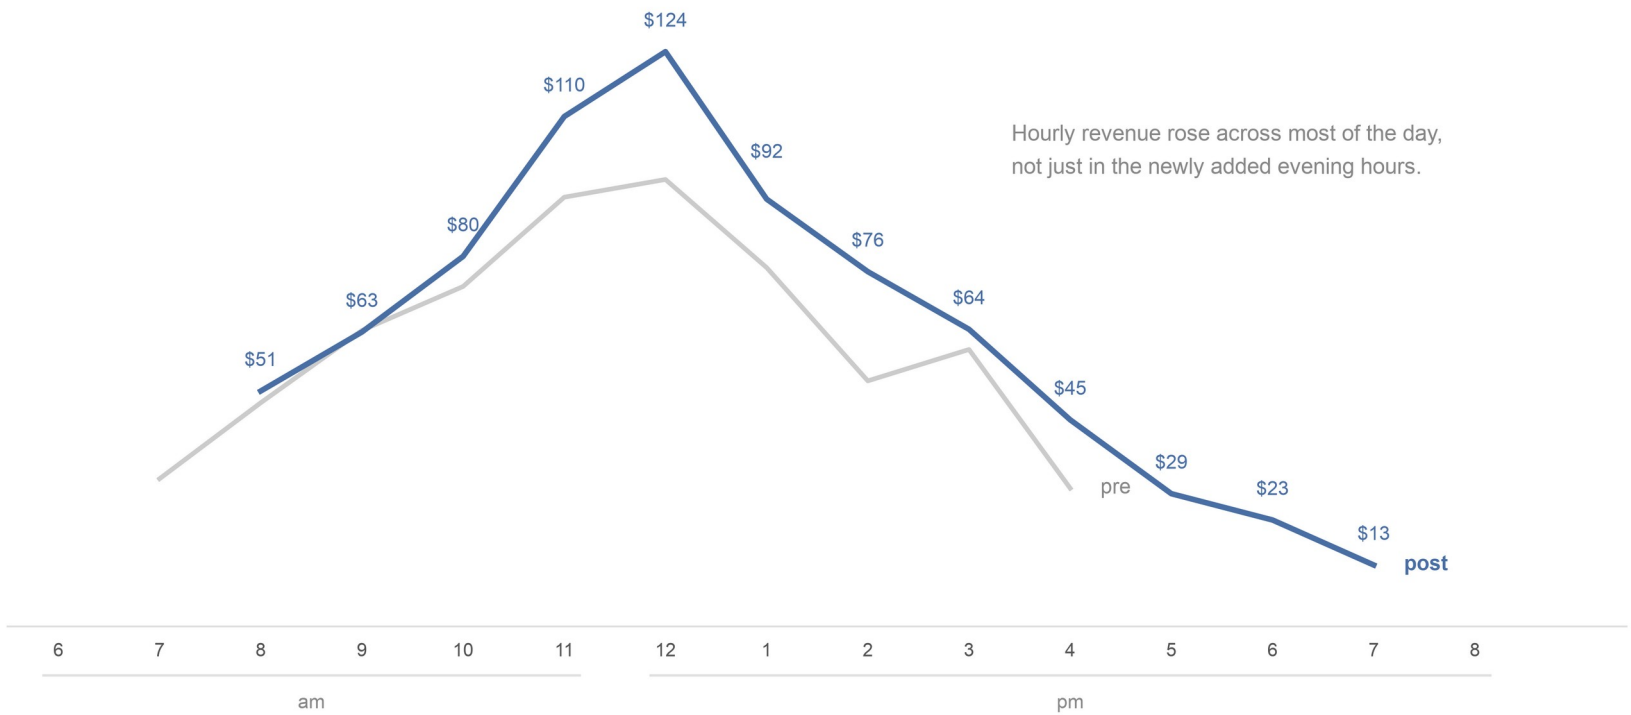

# 5-8pm accounts for just 9% of total post-extension revenue.

**9%**

of post-extension revenue came from 5-8pm

## Revenue rose across the whole day, not just the evening

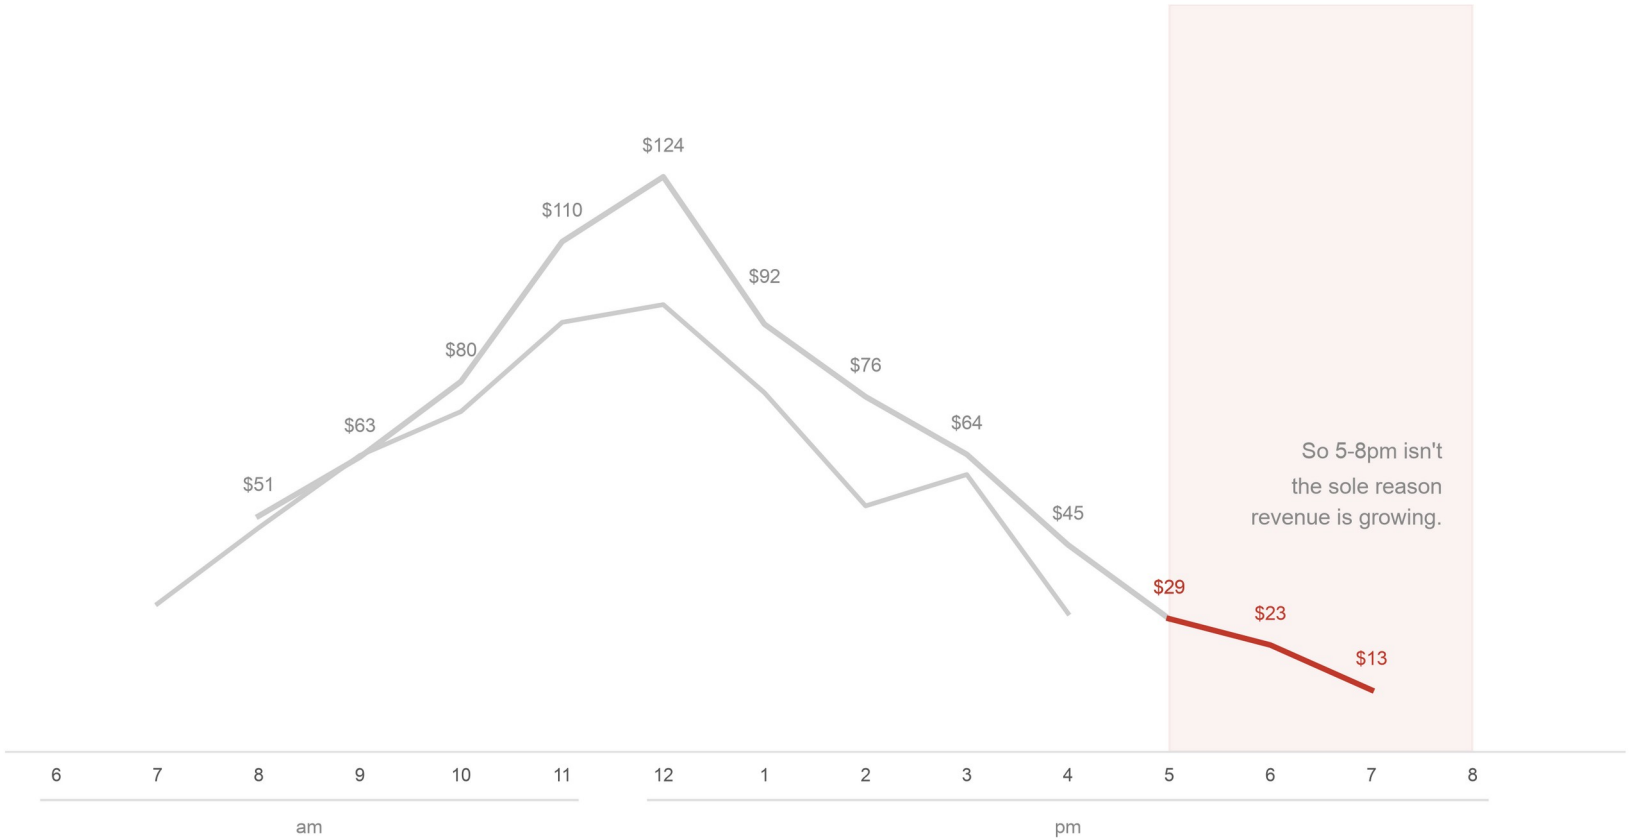

Average revenue by hour ($/hr), pre vs. post extension - weekdays now open ~8am-8pm (was ~7am-5pm)

Hourly revenue rose across most of the day, not just the evening.

## The evening extension barely registers against the rest of the day

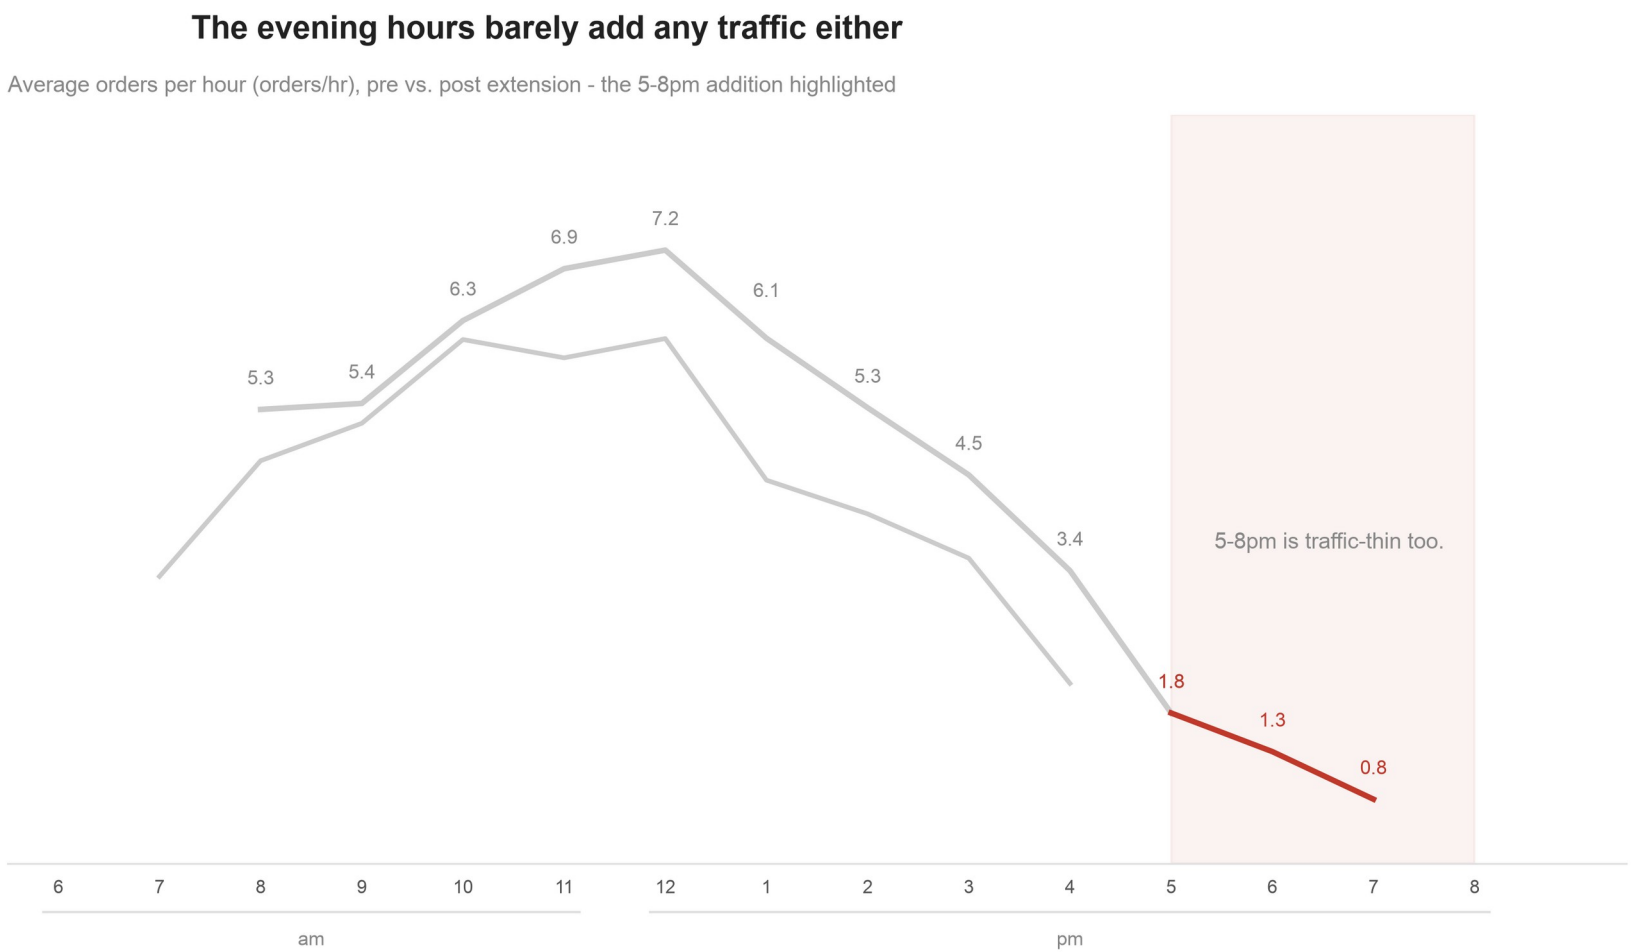

Average revenue by hour ($/hr), pre vs. post extension - the 5-8pm addition highlighted

From 8am-5pm:
Average of $705/Day

From 5-8pm:
Average of $65/Day

$65 / $705 = 9.21%
of Day Revenue

Same pattern holds for orders: just 7% of traffic comes from 5-8pm.

# More than 1/4 of time generates less than 1/10 of total revenue

Share of time

**26%**

of the day's open hours

Share of revenue

**9%**

of the day's total revenue

Share of orders

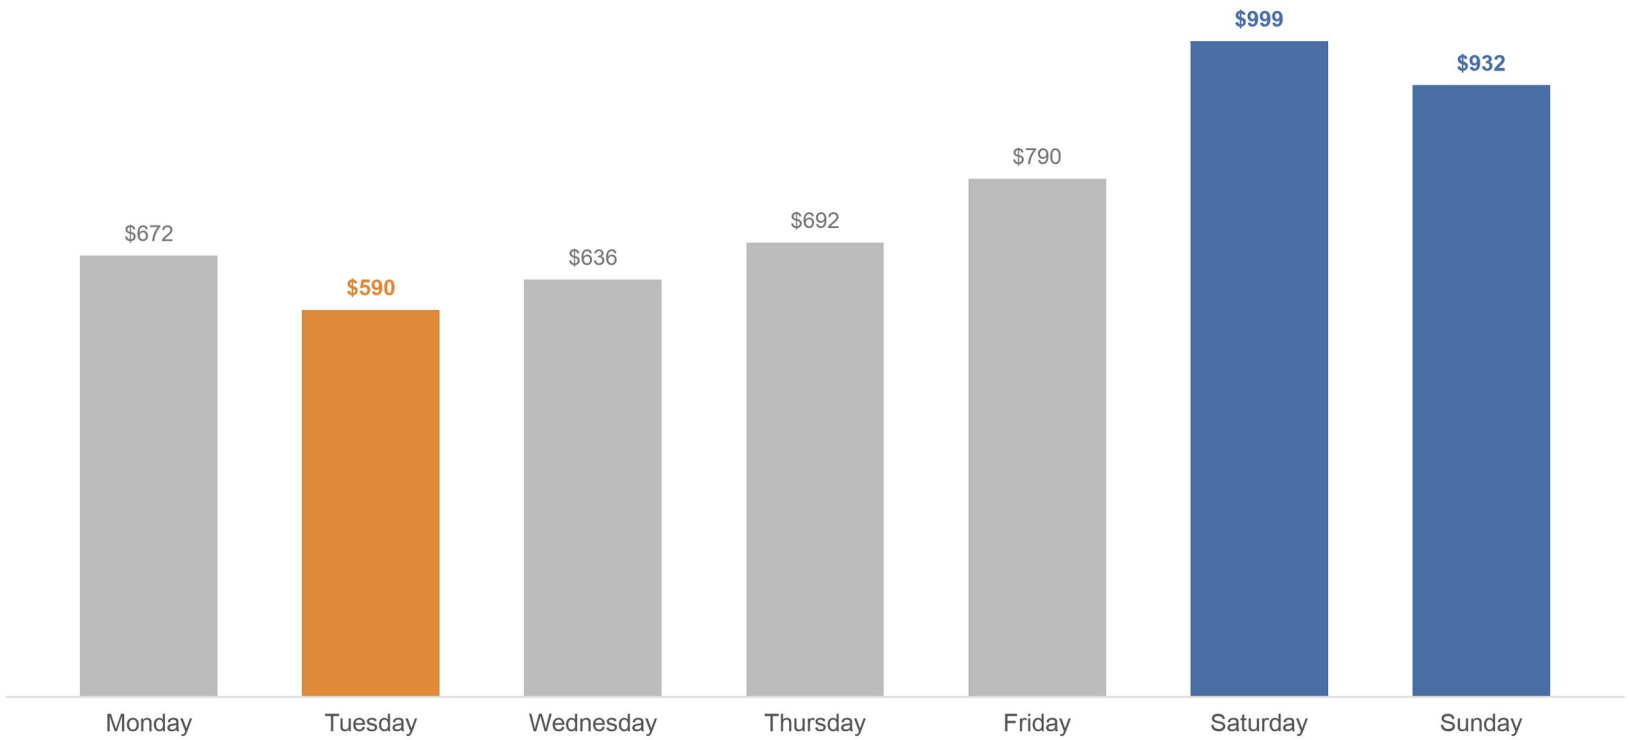

**7%**

of the day's total orders

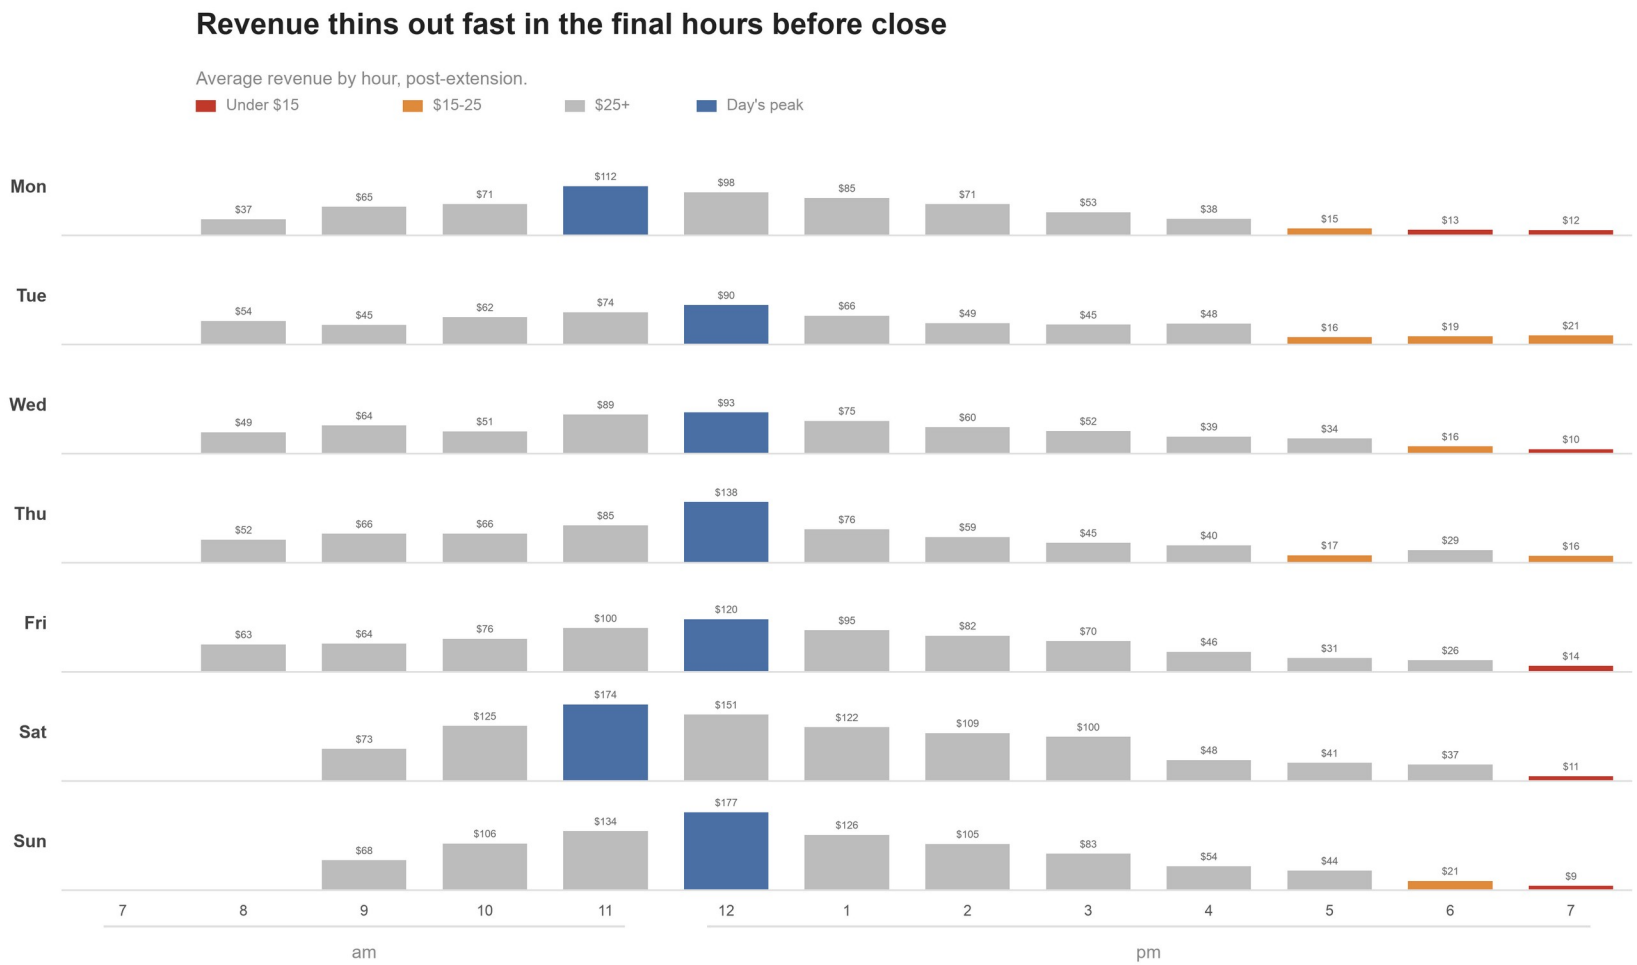

# Is this happening every day of the week?

## Saturday and Sunday lead the week; Tuesday lags behind

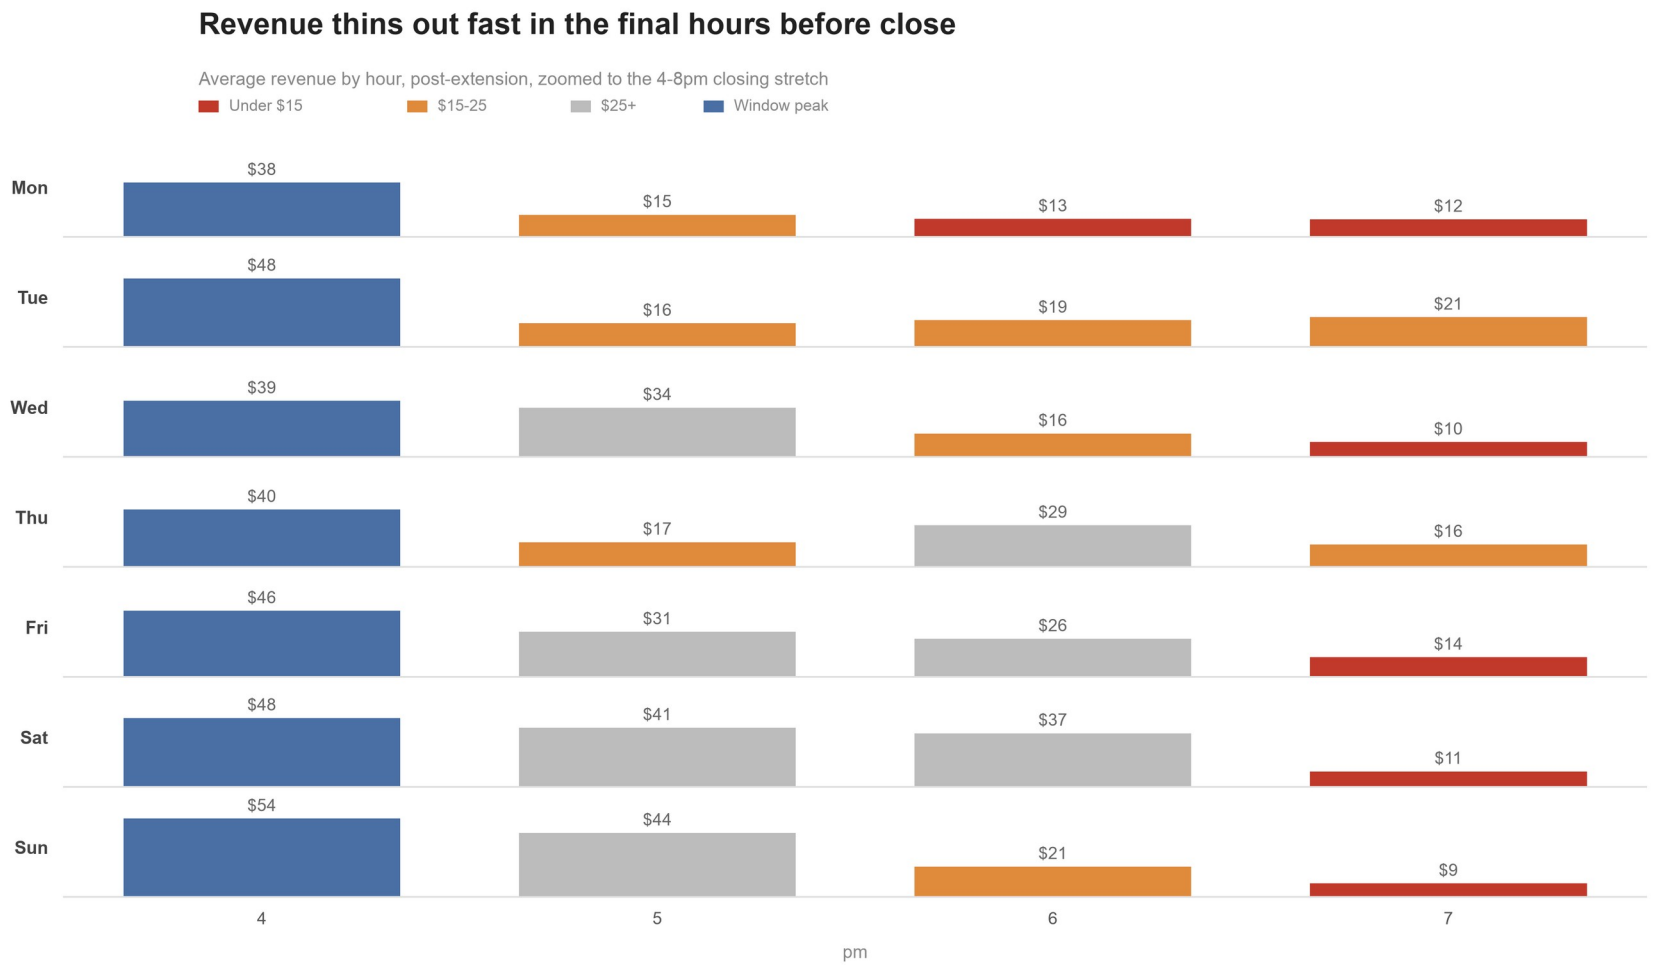

Average daily revenue by day of week, post-extension (Dec 2025 - May 2026)

Saturday and Sunday lead the week. Tuesday lags behind.

Revenue thins out fast in the final hours before close.

Revenue drops from:

5pm:
Monday, Tuesday, Thursday

6pm:
Wednesday, Sunday

7pm:
Friday, Saturday

# If you ever choose to change closing hours

Optimal Hours:

Monday: 8am - 5pm

Tuesday: 8am - 5pm

Wednesday: 8am - 6pm

Thursday: 8am - 5pm

Friday: 8am - 7pm

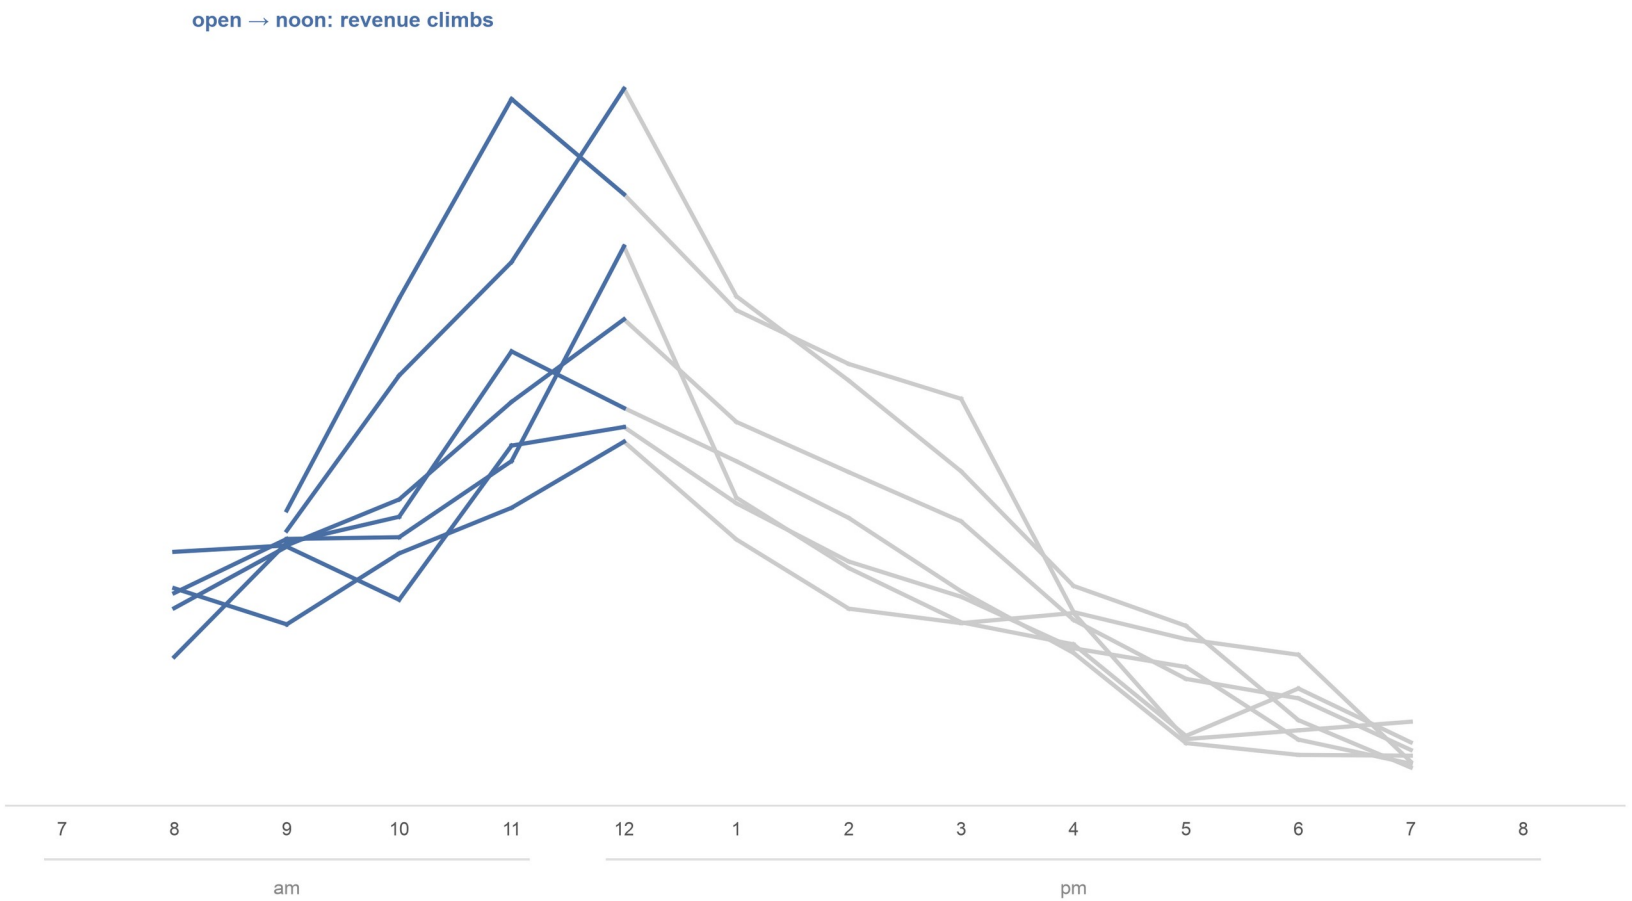

Saturday: 8am - 7pm

Sunday: 8am - 6pm

# How should we staff our hours?

## Every day builds toward the same midday peak

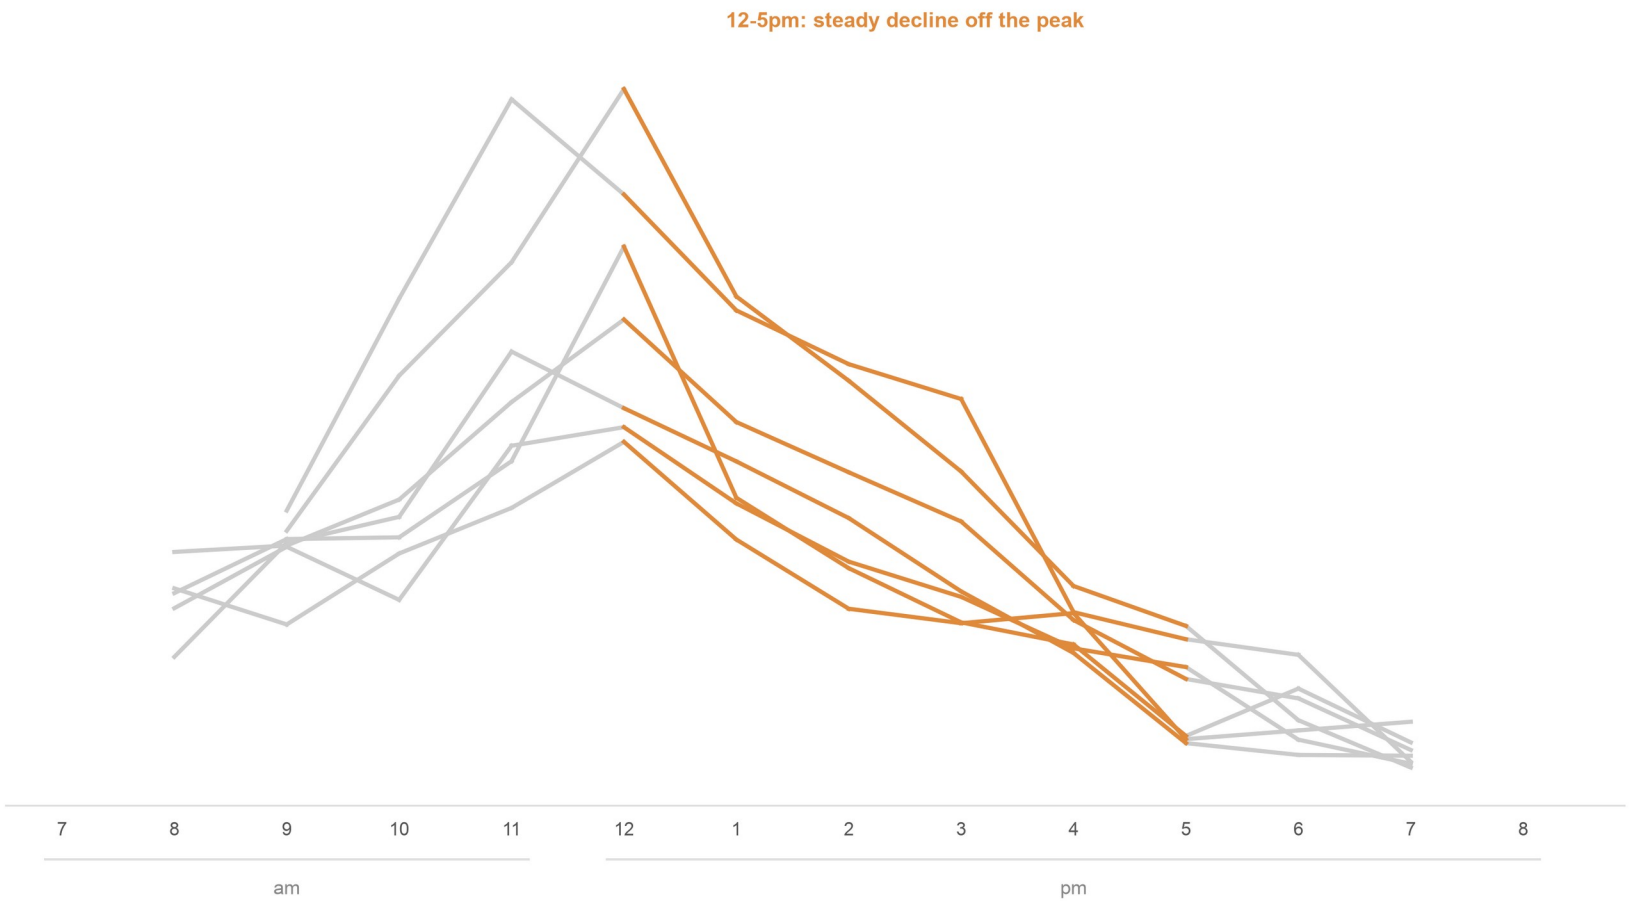

Average revenue by hour, by day of week, post-extension (Dec 2025 - May 2026) - blue marks open-to-noon growth

This is where staffing dollars go furthest.

## Revenue eases off steadily through the afternoon

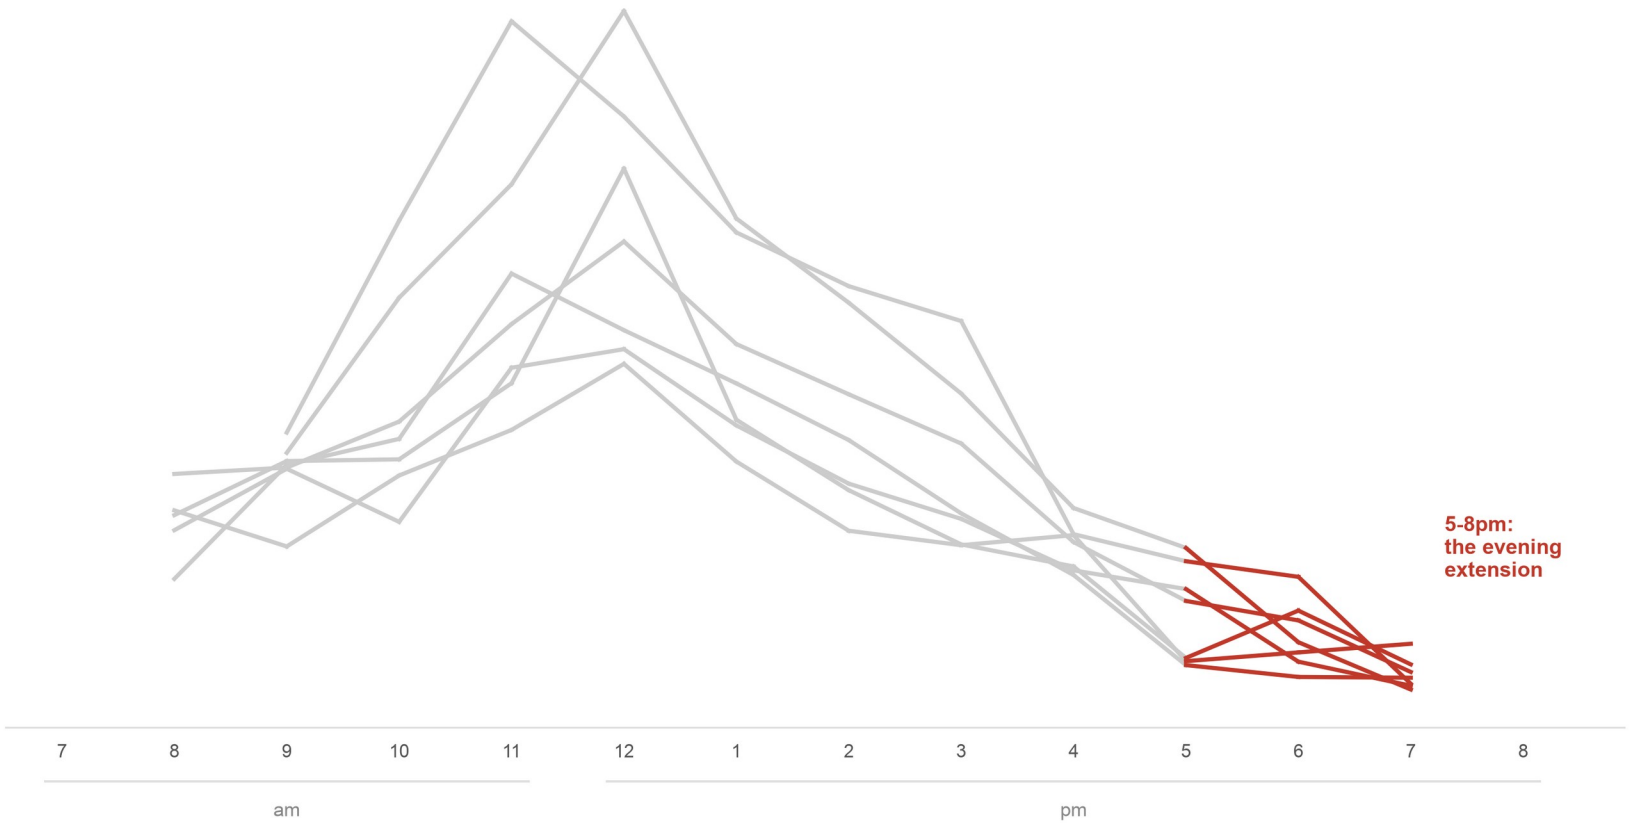

Average revenue by hour, by day of week, post-extension (Dec 2025 - May 2026) - orange marks the 12-5pm decline

Declines steadily from 12pm-5pm.

## The 5-8pm extension sits at the tail end of the day

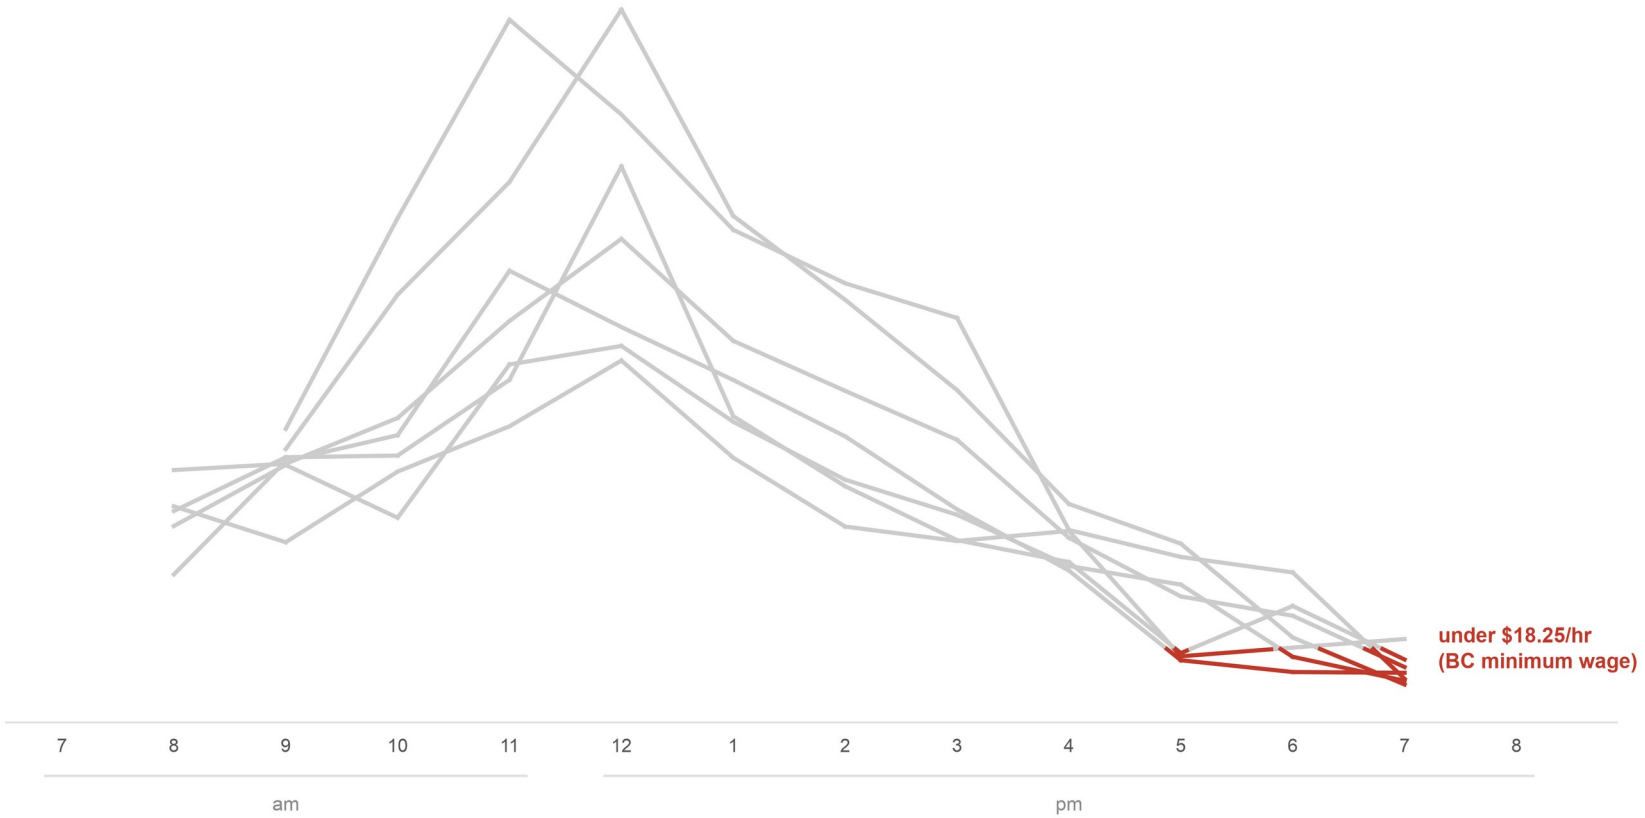

Average revenue by hour, by day of week, post-extension (Dec 2025 - May 2026) - red marks the 5-8pm evening extension

By the time the extension opens, the day's mostly spent.

## Every day dips below minimum wage in its final hours

Average revenue by hour, by day of week, post-extension (Dec 2025 - May 2026) - red marks hours below BC's $18.25 minimum wage

For most days, staffing from the 5-8pm range is losing you money.

# For Staffing

DO NOT STAFF AFTER:

Monday: 5pm

Tuesday: 5pm

Wednesday: 6pm

Thursday: 5pm

Friday: 7pm

Saturday: 7pm

Sunday: 6pm

# Summary

## Monthly Revenue is growing, but it is NOT because of the 5-8pm Extension.

9% of Revenue comes from the extension.

## Closing earlier is a real consideration if the hours/revenue ratio is not worth it.

26% of total opening time spent generating 9% of total revenue.

## Staffing any employees during the extended hours is going to lose you money.

One employee could raise costs to more than 90% of all revenue earned during this time.

PART 2

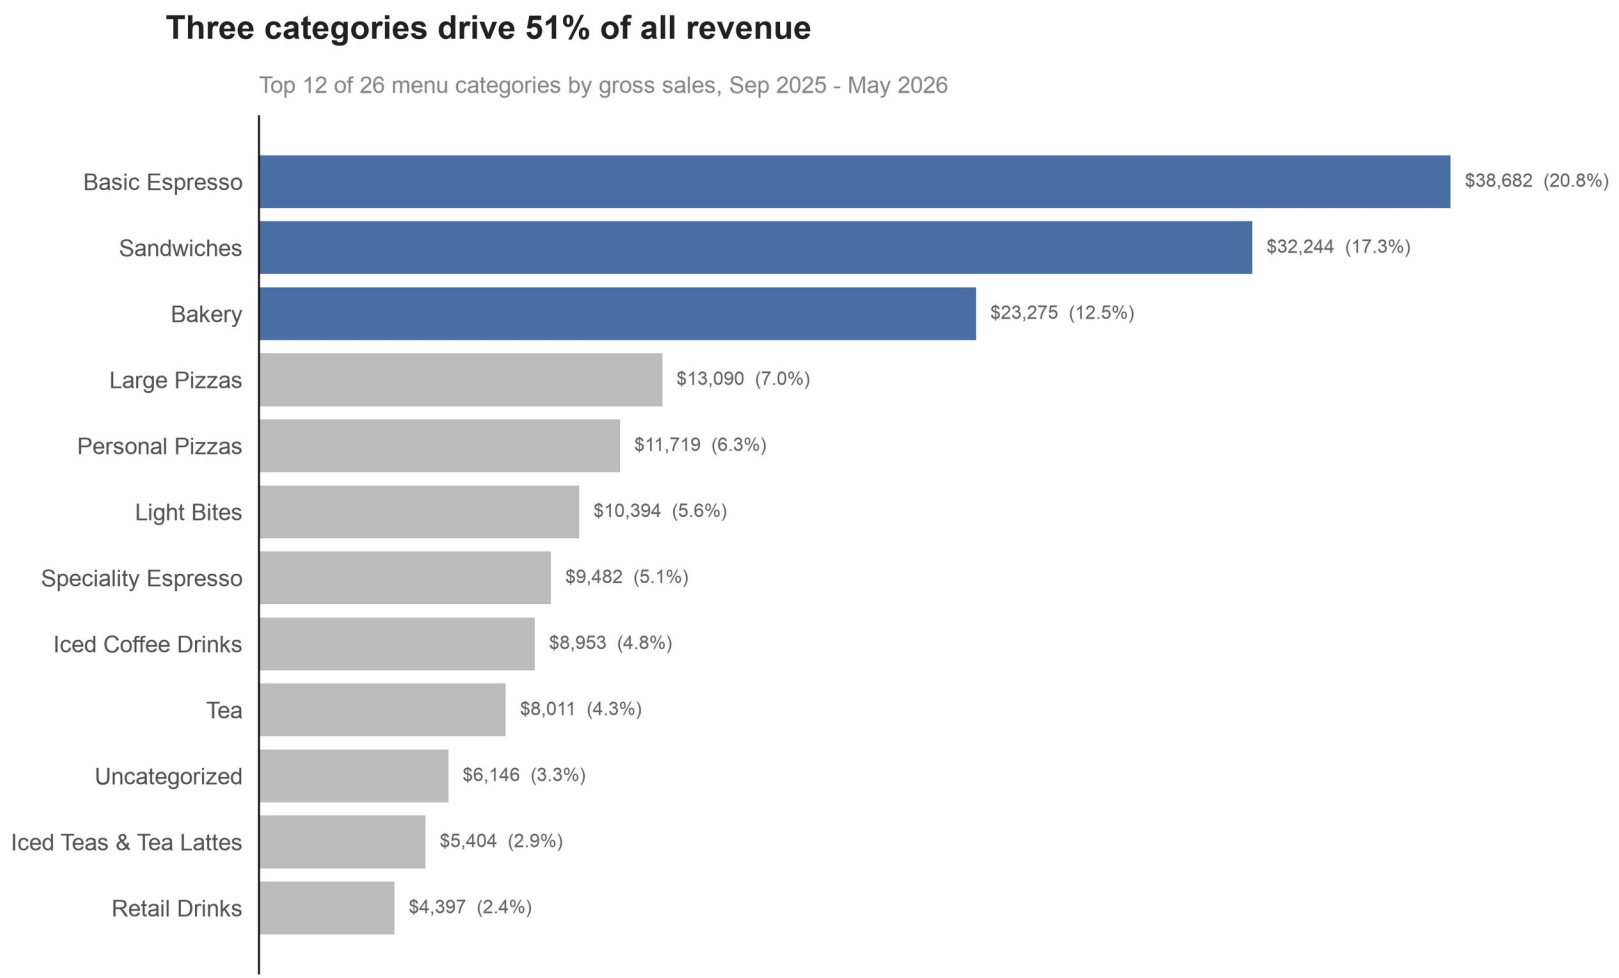

# Menu Performance

Best items? Worst items?

# Every order averages $14.18.

**$14.18**

average transaction value

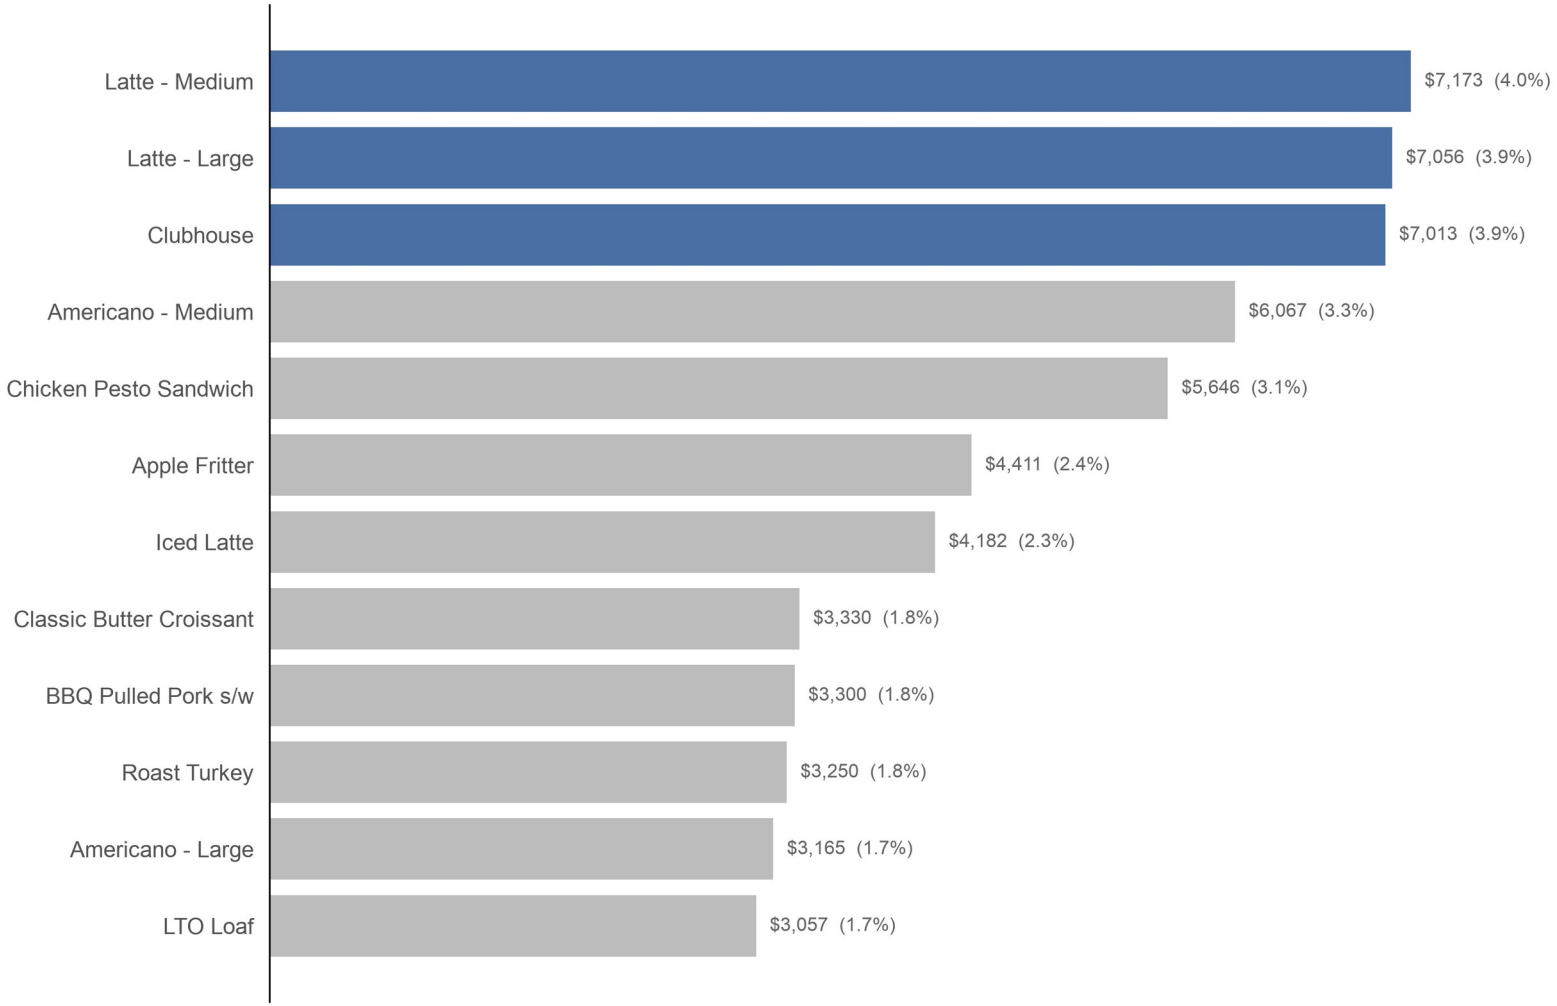

Basic Espresso
Sandwiches
Bakery

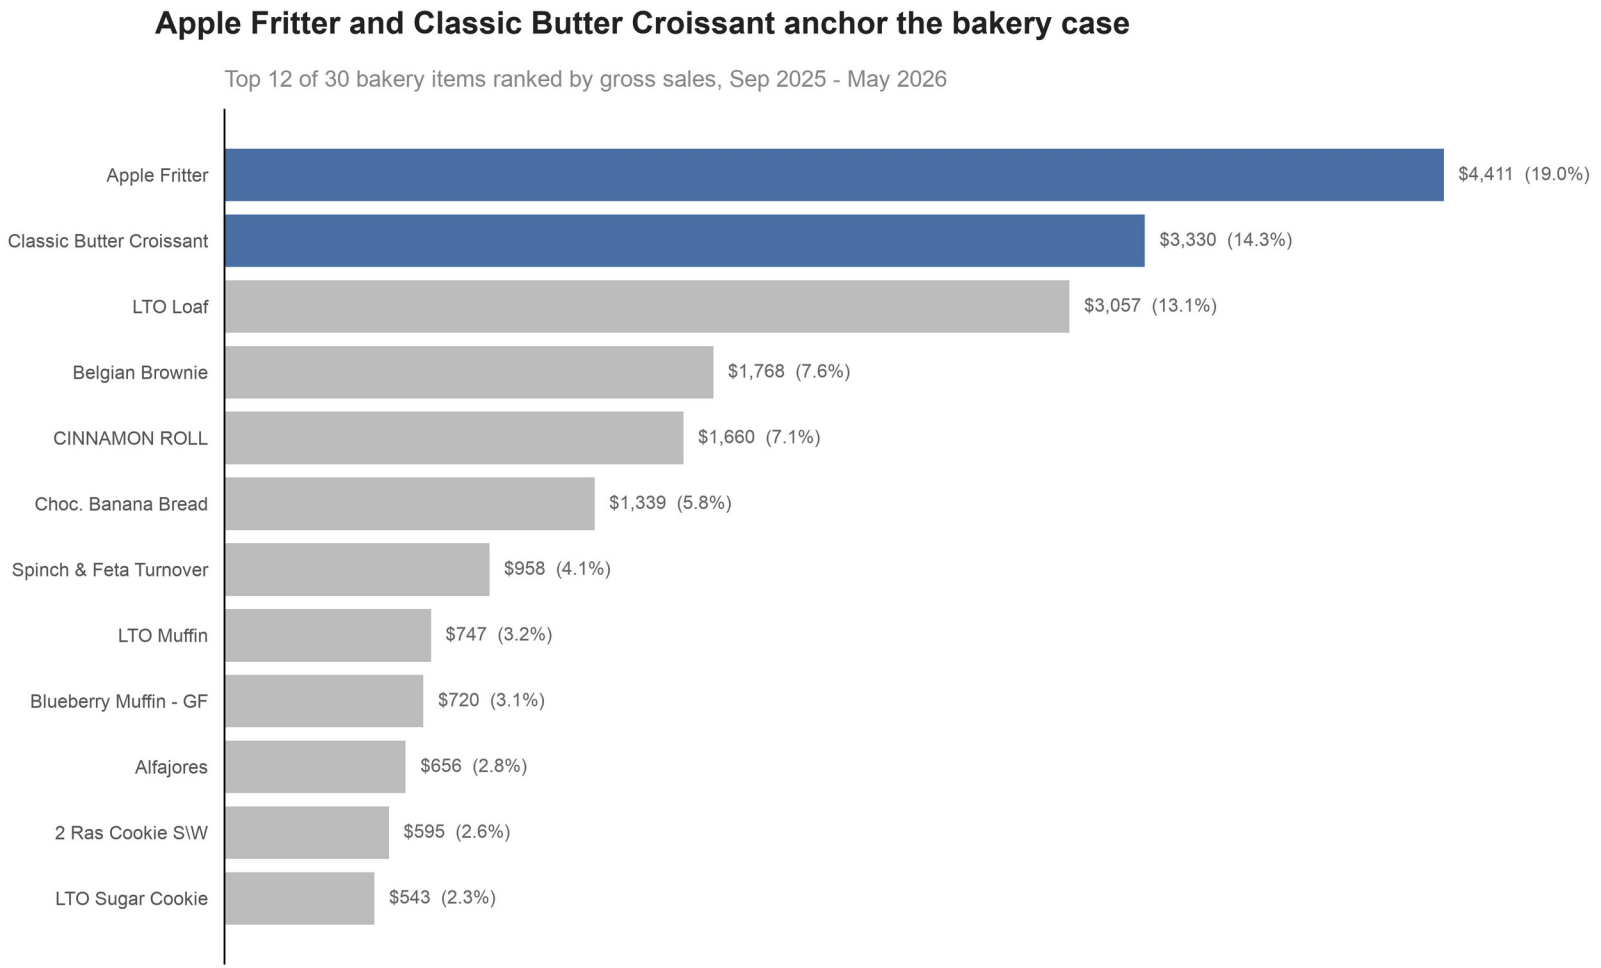

Drive more than 50% of all Revenue

## Lattes and the Clubhouse sandwich are the two revenue anchors

Top 12 items by gross sales, Sep 2025 - May 2026

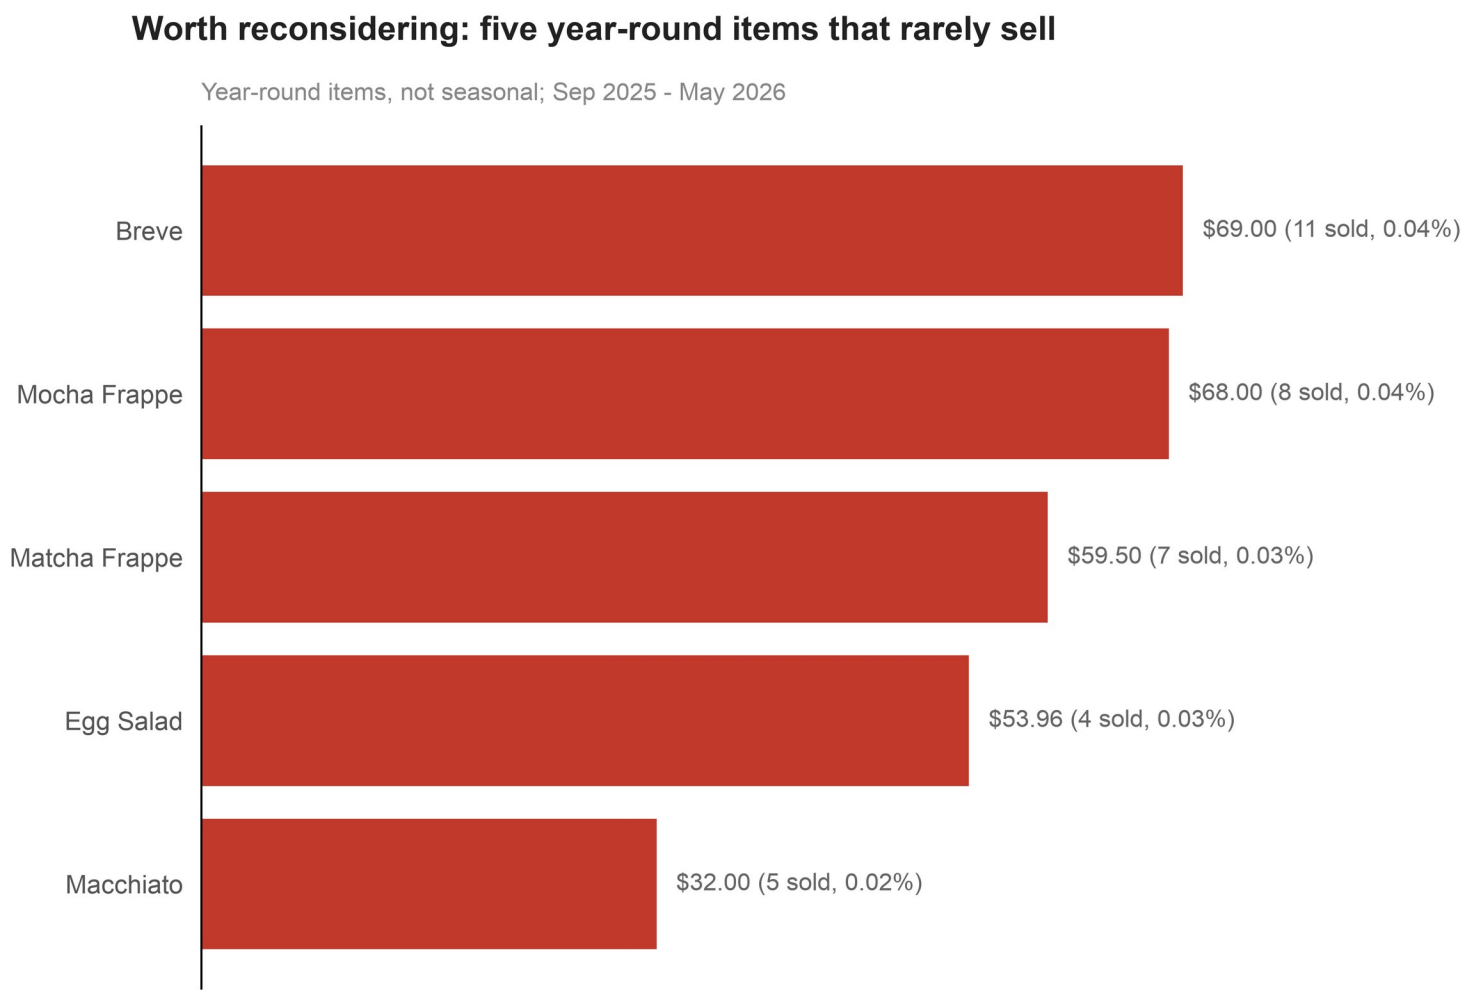

Must-have Items across the entire menu.

## Must-have Bakery Items.

These two alone outsell the rest of the case by a wide margin.

## Still on the menu?

# So, what's the menu doing?

## KEEP

Latte

Clubhouse Sandwich

Apple Fritter

Classic Butter Croissant

## WORTH RECONSIDERING

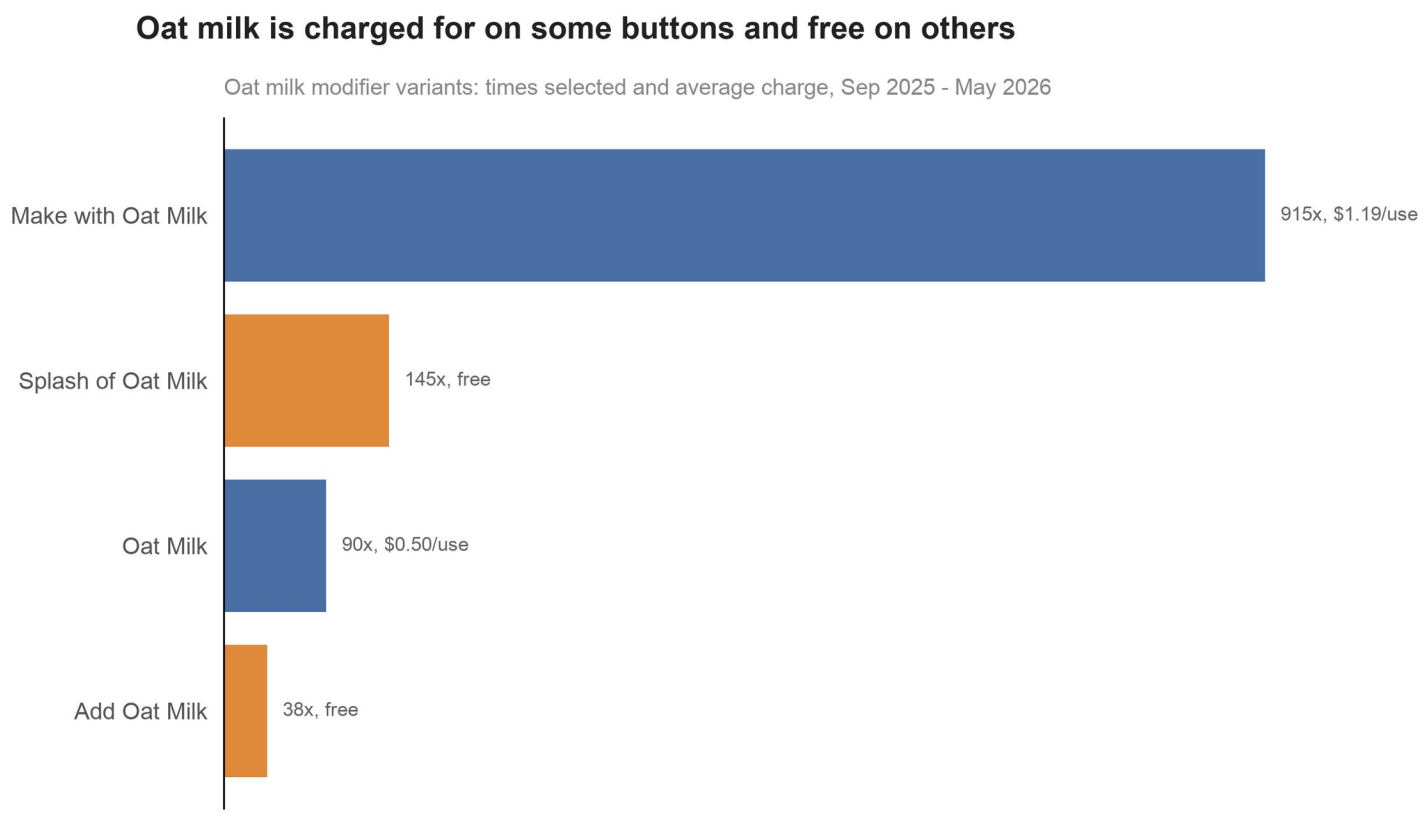

Breve

Mocha Frappe

Matcha Frappe

Egg Salad

Macchiato

## Critical POS configuration?

# A small pricing gap likely cost real revenue over nine months.

**~$280**

estimated revenue missed on free and underpriced oat milk uses

PART 2 SUMMARY

# Summary for Menu Performance

## Four items are critical for the business. Protect them first.

The medium latte, Clubhouse sandwich, Apple Fritter, and Classic Butter Croissant punch far above their weight. Any pricing, recipe, or supplier change should protect these before anything else on the menu.

## Check the five items that are not adding on any real revenue.

The Breve, Mocha Frappe, Matcha Frappe, Egg Salad, and Macchiato might be worth considering to discontinue.

## Fix oat-milk pricing if it's a real mistake.

$280 in free or underpriced pours over nine months, across four buttons. No further analysis needed. This is the fastest dollar in this whole deck.

FINAL SUMMARY

# Everything we looked at in the data

### 1. Monthly Revenue Grew

From $16390 to $29806 (82%+)

### 2. Average Hourly Revenue Increased Across the Day

Ever since the extension, the average hourly revenue increased across the day.

### 3. The 5-8pm Extension was not the Reason

9% of Total Revenue came from 5-8pm.

### 4. Staffing During the Extension Hours Loses you Money

Some hours can't cover the labour costs.

### Therefore, reconsider the Extension.

### 1. Keep the Best Items

These are the winners.

### 2. Increase the Best Items' Prices

Best revenue growth from menu will come from here.

### 3. Reconsider the Worst Items

Best revenue growth from menu will come from here.

### 4. Fix the Oat Milk POS Configuration

Money could be leaking right here.

# Hope this was useful!

Thanks for reading.
